Summary

Kyle has a passion for software development. After years of supporting corporate-level web developers and administrators for Microsoft, he's excited for the opportunity to take on a new career as a web developer.

Highlights

- Complex problem solver
- Experienced debugger
- Strong attention to detail
- Well-organized
- Customer focused
- Fast learner

Experience

Freelancer/Student   **Various**   *2015-Present*

Currently studying web development through resources such as YouTube, FreeCodeCamp, Codecademy, and others. Utilizing Jade/Pug, SASS, Bootstrap, Angular, Gulp, and GitHub for various personal and learning projects.

Web Developer Escalation Engineer   **Microsoft**   *2005-2015*

Provided escalation-level support to Microsoft's enterprise web developer clients. Debugged corporate website issues, such as site performance and crashes or error messages. Utilized deep source code-level knowledge of Internet Information Server (IIS), ASP, ASP.NET, VB.NET and C#.

Software development activities included creating an internal canned response manager and a case/time tracker utility written in VB.NET/ASP.NET.

Education

Winthrop University   **Non-Degree**   *2013-2015*

Courses:
- Web Design
- Web Application Development
- Interactive Media
- Server-Side Programming
- Object Oriented Programming
- Database Processing

Technologies:
- HTML5, CSS3, JavaScript, jQuery, and Photoshop
- PHP, Symfony2, Twig, Doctrine, and GitHub
- MySQL and MongoDB

Bellevue College   **Associate Degree**   *2008*

Studied Business & Computer Science. Graduated "with Distinction".
